

The Body Magic Story

Ardyss International was started in 1989 in Mexico. It became a network marketing company in May 2007, and since then, Ardyss has seen tremendous growth through the sale of several of its products, one being the Ardyss Body Magic reshaping garment. The Ardyss Body Magic reshaping garment is designed by an orthopedic surgeon. It has many health benefits for women. It is an improved and transformed corset, which was used in earlier times to reduce the waist and shape the female figure.

This product is very effective in reshaping the body by reducing it up to three dress sizes while accelerating the process of weight loss. The Ardyss Body Magic does what is called "Lipo Transportation," which means it takes a woman's fatty tissue and moves it from where it is to where it needs to be in her body.

There are only two places a woman needs fat tissue and those are the breasts and buttocks. The Body Magic offers every woman the extraordinary opportunity to look and feel better about her body. This garment is ideal for the times women want to fit into that "special" dress that no longer looks special when they put it on due to the extra weight. It will help any woman have the perfect shape she has always desired.

The Body Magic is the perfect complement for body reshaping. It is unique since it can instantly reduce a woman two to three dress sizes in a matter of minutes due to the fat redistribution process.

This garment is also ideal for caring for the female skeletal system as it favors correct posture of the spinal column. Not only does it make a woman look slimmer, her body will acquire an esthetic and female shape.

The Ardyss Body Magic was originally created to help overweight women to recover their figure, shaping their body while in the weight loss process. Size reduction, body reshaping and a correct posture will make anyone look and feel great.

The reshaping garment also gives the appearance of a breast lift. It reduces the waist, lifts, rounds a woman's buttocks, positions them in their correct anatomical place for a proper function, and prevents sagging. This dynamic body reshaper also gets rid of love handles, back and underarm fat, giving a smoother, more feminine figure.

The Ardyss Body Magic is designed to exert pressure on the abdomen, generating a protection that prevents fat accumulation in the abdominal walls. It gives the appearance of an instant tummy tuck!

When most think of "corsets," they think of something tight and uncomfortable. However, this body reshaper gives the incredible transforming results of a corset without the discomfort. Because it favors correct posture and improves blood circulation, it enhances the results of physical activity. Therefore, it is as safe and comfortable to work out in as a sports bra.

The reshaping results obtained with the Body Magic can be likened to those of lipo-sculpture but without the pain of surgery. Because of the exerted pressure your body undergoes with wear of the garment, the fat redistribution helps to firm up the fatty areas of the back, abdomen, buttocks and thighs.

Wearing the garment, a woman will find that she is increasing the performance of the internal organs located in the abdominal cavity. This is because they are placed where they are supposed to go in the body and they recover lost pressure improving their function.

With the body reshaper, women have testified of improved self-esteem, health, weight loss, and lifestyle. The Ardyss Body Magic gives an instant tummy tuck, breast lift, rounded, fuller-looking buttocks and great Posture, all without diets, exercise, pills or surgery!
